Trivia Challenge

Which comic book character was seen somewhere in every episode of Seinfeld?

In the board game "Clue" what is the name of the Colonel?

In which country is the oldest university in the world situated?

Answers appear elsewhere on the page

Do-Cut's Safety Tips

- Tag the shutoff valves in your home for gas, oil and water so that they are easy to identify in an emergency.
- Keep a First Aid kit and a Family Disaster kit handy with a written family evacuation plan.
- Replace the batteries in your smoke and carbon dioxide detectors every time you adjust the clocks for daylight savings time.
- Install rubber suction mats or adhesive appliques in showers and tubs to minimize the risk of slipping and falling.

A Standby System can be your "Guardian"

When you lose power, it's usually in the middle of a big storm and not when you want to go outdoors. With the **Guardian®** emergency automatic home standby generator, you won't have to lift a finger to get the power you need when the utility company can't deliver.

The **Guardian®** automatically comes on when there is an interruption in power and will continue to run until power is restored.

The commercial quality engine runs on either Natural Gas or Liquid Propane, depending on your needs.

Unlike other pre-packaged systems, the **Guardian®** includes an automatic transfer switch with all models. This device will ensure your electrical loads are powered...

Even when you are not there. This sophisticated unit performs a self-test weekly to ensure everything is operating properly.

With the **Guardian®** on duty, you and your family can stay warm and dry in your home instead of battling the elements. You also won't be searching for an extension cord, finding the gas can, and trying to get that old generator started.

Stop in either the Warren or Canfield **Do-Cut** Sales and Service to see this innovative machine and ask a sales professional which model is right for you.
