- What is the only planet to rotate in a retrograde or clockwise fashion?
- What was the first political party in America?  
A: Federalist  
B: Republican  
C: Whigg

Answers appear elsewhere on the page

### Do-Cut's Safety Tips

- Make sure the temperature in your refrigerator is 40° or lower. Get a good thermometer for the fridge, keep it where you can see it and check it often.
- To prevent back injuries, test every load before you lift it by pushing the object lightly with your hands or feet to see how easily it moves. This tells you about how heavy it is
- Never connect a portable generator directly to your home's electrical supply. The resultant backfeeding could be stepped up by utility transformers to thousands of volts and could injure a lineman.

## Leaf Relief is available in many forms

Although you can not often make accurate predictions regarding lawn maintenance, one thing is certain. The leaves on the trees are all coming down and they will be on the ground before you know it.

**Do-Cut** Sales and Service has the "Leaf-Relief" you Are going to need with a complete line of handheld, backpack and walk behind blowers, chippers and lawn vacuums. We also feature a complete line of commercial quality Truck Loaders for professionals looking to "clean up" with leaves.

Power Flow systems such as **Trac-Vac®** and **Agri-Fab®** will work with your tractor to take care of larger lawns and grounds.

**Stihl®** handheld and backpack blowers are among the industry's finest and most durable equipment. Some models can be converted to sprayers and vacuums very easily making them the most versatile as well. The BG85 provides 189 MPH wind velocity while the BR550 tops out at just under 200 MPH.

For larger areas, consider the **Little Wonder®** line of walk behind blowers. These blowers are, quite simply, the best-designed

blowers in the world. Not only do you get unmatched leaf-blowing efficiency, **Little Wonder®** blowers are ideal for moving stubborn debris; removing standing water; preparing asphalt for resurfacing; preparing flat roofs for resurfacing, or for any job that requires hurricane-force air. Available with Honda or Briggs and Stratton engines, these Super High Out-put blowers handle the tough jobs.

For leaf removal rather than leaf movement, consider a lawn vacuum. **Troy-Bilt®** offers a self-propelled walk behind vacuum that also includes a 3" chipper chute. Powered by a **Briggs & Stratton®** OHV engine, this versatile machine reduces leaves 10:1.

**Little Wonder®** debuted a walkbehind vacuum that is commercially tough. This unit is able to collect stones, bottles, cans and other debris too tough for most units. Large pneumatic tires, an oversized collection bag and an automatically adjusting nozzle are just some of the features of this tough machine. For larger yards where riding

### New Items and Specials

- Now through September 17th, get a **Weed-Eater®** Electric Blower Vac for only \$34.99!! Save \$30.00 off of the list price of \$64.99.
